

Project Initialization and Planning Phase

Date	05 July 2026
Team ID	
Project Name	Voice-Based Concept Understanding Analyser
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
An educator evaluating student concept understanding.	Assess students' spoken explanations of technical concepts.	Manual evaluation is subjective, inconsistent and time-consuming.	Teachers lack real-time, AI-driven insights into conceptual understanding.	Confident in data-driven results and able to help students improve effectively.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An educator using AI tools to evaluate students' spoken conceptual explanations.	Automatically analyze speech explanations to measure real conceptual understanding.	Existing methods (manual grading or basic quizzes) fail to capture depth, clarity, and confidence consistently.	Concept understanding depends on communication skills, speech patterns, and semantic alignment, which are hard to measure manually.	Assured of objective results, clear feedback, and actionable insights to improve student learning outcomes.
