

Customer Journey Map

Date	5 July 2026
Team ID	–
Project Name	Voice-Based Concept Understanding Analyser
Maximum Marks	3 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Input & Submission	Stage 2 Analysis & Results	Stage 3 Feedback & Improvement
Actions <i>What does the customer do?</i>	- Opens the application - Allows microphone access - Speaks the concept or uploads an audio file - Submits the input	- System converts speech to text - Analyzes the concept using NLP/ML models - Generates score and explanation - Displays results to the user	- Reviews the analysis and score - Provides feedback / rating - Explores history or tries another concept
Touchpoint <i>What part of the service do they interact with?</i>	- Landing page / Home - Voice input section - Upload audio button - Submit button	- Processing / Loading screen - Results page - Explanation & related concepts - Score & suggestions	- Feedback form / rating - History & reports section - Try another concept option
Customer Thought <i>What is the customer thinking?</i>	- Is my voice clear? - Will the system understand my concept correctly? - Is my input submitted successfully?	- Is the analysis accurate? - Do I understand the explanation? - How well did I perform on this concept?	- Is my feedback useful? - Can I improve my understanding? - I want to try another concept.
Customer Feeling <i>What is the customer feeling?</i>	- Curious - Hopeful - Expectant	- Engaged - Informed - Satisfied (if results are helpful)	- Confident - Satisfied - Motivated to learn more

Process Ownership <i>Who is in the lead on this?</i>	- Frontend Developer (UI/UX) - DevOps (Deployment & Access Setup)	- Backend Developer (API) - ML Engineer (Model & NLP Pipeline)	- Backend Developer (Feedback API) - Data Analyst (Reports & Insights)
Opportunities <i>How can we improve this stage?</i>	- Add voice noise cancellation - Provide sample concepts - Show input quality indicator - Support multiple languages	- Improve model accuracy with more data - Reduce response time - Provide detailed suggestions for improvement	- Make feedback more interactive - Add concept history comparison - Introduce learning resources based on weak areas - Gamify with badges & progress
